The book is an in-depth and comprehensive analysis of the case of language in education reform and language policy controversies of Hong Kong over the initial two decades after 1997. It is a scholarly monograph of conscientious educators and researchers who have been active during the education reform, collaborating with different parties on school development and classroom teaching experiments. This book provides a multiple-perspective investigation into the education and language matters. Besides socio-political perspectives, this book also emphasizes the frontline educational and practical perspectives. The book explores the benefits and effective methods of mother-tongue and multi-lingual teaching that have emerged in the period. Based on the problematic experience of language purism and bifurcation in the reform, the book argues for an inclusive multilingual education policy with mother-tongue as the core. This book provides potential solutions and good practices to tackle the complex issues brought about by medium of instruction policy reforms in post-colonial times.

This book explores the interrelationship between ideology, the state, and education reforms, placing it in a global context. It examines some of the major education reforms and policy issues in a global culture, particularly in light of recent shifts in quality and standards-driven education, and policy research. The book critiques the neo-liberal ideological imperatives of current education and policy reforms, and illustrates the way the shifts in the relationship between the state and education policy affect current trends in education reforms and schooling globally. With this as its focus, the book's individual chapters highlight hand-picked scholarly research on major discourses in the field of comparative education. A compendium of the very latest thinking on the subject, the book - like the other volumes in the series - offers a state-of-the-art sourcebook for researchers, practitioners and policymakers alike. Not only do the chapters offer a timely overview of current issues affecting comparative education and education policy research in what is now a global educational culture; they also outline future directions that education and policy reforms could take. By doing so, they provide a comprehensive picture of the intersecting and diverse discourses of globalisation and policy-driven reforms in education. Individual chapters critically assess the dominant discourses and debates on education and policy reforms. Using diverse comparative education paradigms from critical theory to historical-comparative research, they address globalisation, ideology and democracy and examine both the reasons for and outcomes of education reforms and policy change. As such, they provide an informed critique of models of quality and standards-driven education reforms that are informed by Western dominant ideologies and social values.

This book contains a collection of papers presented at a series of meetings organised by the Wessex Institute of Technology (WIT) dealing with sustainability, the environment and ecological issues. The complexity of the modern world presents new challenges to scientists and engineers that requires finding interdisciplinary solutions. Any problem solving carried out in the isolation of a particular field of expertise may give rise to a series of damaging effects which can create new and unintentional environmental and ecological problems. Specialisation, while required in our culture, needs to be kept under control by the understanding of the whole, which leads to the need of relying on interdisciplinary teams. Nowadays this can be easily achieved thanks to the massive advances in information technology which ensure continuous and immediate contact between all partners. This collaboration needs to be effective and to produce results that will lead to a better world. For this to happen, it is necessary that different groups of scientists and engineers acquire the necessary skills to be able to talk to each other. Furthermore, they need to understand the social and economic aspects of a given problem, in addition to the scientific and engineering issues involved. The Wessex Institute of Technology (WIT) has a long and very successful record in organising interdisciplinary conferences. The papers in this book are a reflection of the proceedings of some of those meetings.

In this extensively revised seventh edition textbook on development economics, all statistics have been updated and new institutional material has been added. In addition there are new sections on the meaning and consequences of globalization, the World Bank's approach to tackling poverty, the impact of aid, trade liberalization and growth, and exchange rates for developing countries.

Vincent Ettrich, a genial philanderer, discovers he has died and come back to life, but he has no idea why, or what the experience was like. Pushed and prodded by strange omens and stranger persons, he gradually learns that he was brought back by his one true love, Isabelle, because she is pregnant with their child-a child who, if raised correctly, will play a crucial role in saving the universe. But to be brought up right, he must be educated in part by his father. Specifically, he must be taught what Vincent learned on the other side-if only Vincent can remember it. On a father's love and struggle may depend the future of everything that is. By turns quirky, romantic, awesome, and irresistible, *White Apples* is a tale of love, fatherhood, death, and life that will leave you seeing the world with new eyes. Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at

a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Guangwei Hu, National Institute of Education, Singapore Additional online resources are available at www.oup.com/elt/teacher/emi Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university. Reflecting the very latest theory on diversity issues in science education, including new dialogic approaches, this volume explores the subject from a range of perspectives and draws on studies from around the world. The work discusses fundamental topics such as how we conceptualize diversity as well as examining the ways in which heterogeneous cultural constructs influence the teaching and learning of science in a range of contexts. Including numerous strategies ready for adoption by interested teachers, the book addresses the varied cultural factors that influence engagement with science education. It seeks answers to the question of why increasing numbers of students fail to connect with science education in schools and looks at the more subtle impact that students' individually constructed identities have on the teaching and learning of science. Recognizing the diversity of its audience, the book covers differing levels and science subjects, and examines material from a range of viewpoints that include pedagogy, curricula, teacher education, learning, gender, religion, and ICT, as well as those of in-service and trainee teachers at all levels.

Modern Auditing & Assurance Services, 6th edition, is written for courses in auditing and assurance at undergraduate, postgraduate and professional levels. The practice of auditing is explained in the context of auditing theory, concepts and current practice, with appropriate reference to the Australian auditing standards and the respective international standards on auditing. Auditors play a vital role in the current economic environment, with increasing responsibility for ensuring market integrity. The development of auditing practice reflects how the accounting profession responds to the complex demands of information, competition, corporate failures and technology. Auditing continues to evolve in response to the changing business and regulatory landscape to maintain its relevance and importance. This book is a comprehensive guide to the development and practice of audits of a financial report, with an authoritative insight into the fundamental role of auditors, the influences on audits, and related issues.

Each chapter in the book is firmly rooted in research and is well referenced as one would expect of such a book. It will be of particular use to people with an academic interest in this aspect of school management but will also be thought-provoking for those who are involved in the development of the curriculum within their institution' - escalate This book explores many of the new aspects of the core business of schools and colleges, that is, the curriculum. Keeping the focus clearly on learning and teaching, the contributors explore the practical issues for managers at institutional level, within the context of their need to understand and analyze key educational values and principles. Part One presents overviews of theories and models of curriculum, while Part Two examines how these are applied through planning, monitoring and evaluating. Part Three explores in detail the various managerial roles within schools and colleges from leaders to those responsible for cross-curriculum work and special educational needs. The fourth part discusses the importance of effectively managing resources for the curriculum - the environment, support staff and finance. Contributors use empirical research evidence to analyze current curriculum trends whilst proposing various new models which are likely to emerge in the 21st century.

As the world evolves in increasingly unpredictable directions, one of the key determinants of the future global order will surely be the impact of China. No country and no society can escape China's reach-indeed many seek its embrace. China brings benefits to many-but it's also a problematic interloctor for others. In *China and the World*, one of the world's leading China specialists David Shambaugh has assembled fifteen leading international authorities on China to create the most comprehensive and up-to-date scholarly assessment of China's foreign relations and roles in international affairs. The volume covers China's contemporary position in all regions of the world, with all major powers, and across multiple arenas of China's international interactions. It also explores the sources of China's grand strategy, how the past shapes the present, and the impact of domestic factors that shape

China's external behavior. *China and the World* is a uniquely focused and well-organized volume that provides many insights into China's calculations and behavior, and identifies a number of challenges China will face in the future.

In the wake of the 1997 Asian financial crisis, various reform initiatives, policies and programmes have been carried out in different countries within the Asia-Pacific region. All these reform efforts aim to restructure different aspects of schooling in order to promote learning and to prepare students for future challenges in globalised economies. These measures to a certain extent challenge traditional practices, established arrangements and deep-seated assumptions related to different aspects of learning. The authors in this book discuss educational reforms in different countries in the Asia-Pacific region in light of student learning, clarify their concepts, evaluate implementation and impact on the learning processes, with a hope that we can learn better from each other and develop a better understanding of "contemporary" learning and teaching processes within the region. The central argument running through different chapters in this book highlights the importance of understanding reforms and learning within their historical, political and sociocultural contexts. Reforming learning involves changes in established cultural practices in our schools, classrooms, and other learning sites, and therefore inevitably arouses tensions and negotiations. The discussion in this book puts to the fore the disputable nature of reforming learning and the significance of contextualising the complex relationship between reforms and learning.

How does an artist's interpretation of historical events alter our understanding of them? Kings, queens, presidents, and generals from Alexander the Great to Theodore Roosevelt have commissioned paintings, drawings, sculptures, and photographs of major events, and artists have responded to important moments with works that forever shape historical memory. The book deals with specific episodes, from the proclamation of the Code of Hammurabi to more recent events such as the fall of the Berlin Wall and the terrorist attacks of September 11, 2001. It also deals with broader themes, such as the founding of states (Persia, Rome, the Chinese Empire, the United States) and war (Delacroix's *Liberty Leading the People*, Picasso's *Guernica*). Here too are the great voyages of exploration, the industrial revolution, and much more. World history is vividly elucidated in these works of art.

Tatum Everley is a freshman at Western Michigan University. Due to an emotionally and psychologically abusive past relationship, Tate struggles from Complex-Post Traumatic Stress Disorder. She has been working on controlling her symptoms and flashbacks, but when she meets Axel Burne at a fraternity party, who is notorious for sleeping around and getting into fights, she tries her best to dodge the bullet. Axel starts to become intrigued by Tate, but she's better off choosing Lucas- the sweet guy who has been trying to take her out since orientation. But even though Lucas is the better option, Axel keeps reappearing. Tate continues to try to stay away from him, but it starts becoming harder to, and as she gets closer to him, things start to get way out of hand. If Tate wants her happy ending and her sanity intact, then she has to push through the hardships and maintain control over her disorder.

Developments of International Trade Theory offers the life-long reflections of a distinguished Japanese scholar who pioneered the application of general equilibrium theory to international trade. Written in a style that makes it easily accessible to scholars and students, the book combines standard topics on international trade with a discussion of the evolution of the theory and as well as recent discussions on topics such as immiserizing growth. This book consists of two parts. Part I examines the historical progression of international trade theory, and Part II addresses the modern theory and recent developments of international trade. In this way the book offers a comprehensive evaluation of the non-monetary problems of international economics. Taking advantage of the publication of this new edition, the author includes two new chapters, "Adam Smith and Disequilibrium Economic Theory" and "Complete Specialization in Classical Economics," which readers will profit from reading after they have studied the basic theories of international trade in the main part of the book.

China, with the world's largest population, numerous ethnic groups and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called "language life" in China. These reports cover language policy and plann-

ing invitatives at the national, provincial and local levels, new trends in language use in a variety of social domains, and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time, these reports are available in English for anyone interested in Chinese language and linguistics, China's language, education and social policies, as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers, and China watchers.

This book explores the influence of high stakes standardised testing within the context of South Korea. South Korea is regarded as a shining example of success in educational achievement and, as this book reveals, pressurised standardised testing has been a major contributing factor to its success. This unique country provides an excellent setting from which to explore the powerful relationship that exists between testing and learning and can advance our understanding of which factors and test conditions will positively and negatively influence learning. This book follows the test activity of a group of Korean university students preparing for the TOEIC (Test of English for International Communication) and posits a revised model of the influence of testing on learning. It calls for a more socially situated view of tests and test-takers considered in relation to the sociocultural, historical, political and economic contexts in which they are embedded.

This volume brings together key writings since the 1992 publication of *Linguistic Imperialism* - Robert Phillipson's controversial benchmark volume, which triggered a major re-thinking of the English teaching profession by connecting the field to wider political and economic forces. Analyzing how the global dominance of English in all domains of power is maintained, legitimized and persists in the twenty-first century, *Linguistic Imperialism Continued* reflects and contributes in important ways to understanding these developments. This book is not for sale in India, Pakistan, Bangladesh, Sri Lanka, Nepal, and Bhutan.

Brian and his friends are not part of the cool crowd. They're the misfits and the troublemakers—the ones who jump their high school's fence to skip class regularly. So when a deadly virus breaks out, they're the only ones with a chance of surviving. The virus turns Brian's classmates and teachers into bloodthirsty attackers who don't die easily. The whole school goes on lockdown, but Brian and his best friend, Chad, are safe (and stuck) in the theater department—far from Brian's sister, Kenzie, and his ex-girlfriend with a panic attack problem, Laura. Brian and Chad, along with some of the theater kids Brian had never given the time of day before, decide to find the girls and bring them to the safety of the theater. But it won't be easy, and it will test everything they thought they knew about themselves and their classmates. Praise for *SICK* "The gore and action will leave enthralled readers thrilled and then sated with each kill on either side." —Booklist "Between the pacing and the heroes' salty, blue language (full of lovingly creative, genital-inspired insults), reluctant readers who love zombies will devour it, right up to the abrupt end." —Kirkus Reviews "Sick is well written, with great detail, even if it is a little gory." —VOYA Magazine Awards 2014 Quick Picks for Reluctant Young Readers list from YALSA
