Peer-review and assessment - Science and Technology ...

The peer review process The peer review system exists to validate academic work, helps to improve the quality of published research and increases networking possibilities within research communities. Read more to find out about how the system works and the different types of peer review that you may encounter.

Become a peer reviewer. External peer reviewers help the NIHR at every stage of the research process. Our reviewers help to prioritise research topics, ensure we fund the best applications and help to shape the open access reports published by the NIHR Journals Library, and in doing so play a vital role in maintaining and improving the quality of our research.

Research Governance and Ethics : Forms and templates

Peer-review and assessment. The assessment of research grant proposals is made by appropriate experts drawn from academia, government and industry. Proposals are usually assessed first by individual reviewers and then by peer review panels. Normally at least two individual reviewers are used, one of whom may be nominated by the applicant, although STFC reserves the right not to use nominated reviewers.

Peer review is the cornerstone of the work of the MRC. All proposals submitted to us are scrutinised by independent scientific experts in a two-stage process. We are creating a unified UKRI website that brings together the existing research council, Innovate UK and Research England websites.
