Want to buy property in Hong Kong, but don't know where to start? It's easier than you think. Over five years, Christopher Dillon—a unilingual expat—bought and renovated an office, an apartment and a factory in Hong Kong. Based on this experience he wrote Landed: The expatriate's guide to buying and renovating property in Hong Kong. Landed Hong Kong explains how properties are bought and sold. It introduces the players and the parts of the buying process that are unique to Hong Kong. It profiles the neighborhoods that are popular with expatriates, and outlines alternatives to investing in residential property. And it looks at how to successfully renovate your new property, using case studies with budgets and lessons learned. Landed Hong Kong concludes with a list of resources covering everything from architects to utilities.

Expatriation is a big topic, and is getting bigger. Over 200 million people worldwide now live and work in a country other than their country of origin. Tens of billions of dollars are spent annually by organizations that move expatriates around the world. Yet, despite the substantial costs involved, expatriation frequently results in an unsatisfactory return on investment (ROI), with little or no knowledge as to how to improve it. Why is this so? Drawing on more than a decade of expertise, research, and publications in top journals, the authors provide you real solutions to achieve more than a satisfactory ROI from expatriates—with rule number one being: Understand expatriates themselves. This book provides a practical “insider's” guide that reveals why expatriates seek and accept international assignments; how they feel impacted by new forms of remuneration and other working conditions; how international assignments fit in with their longer-term career aspirations; and what complications arise in terms of their families. Whether you're a manager or consultant, inside you'll learn what modern-day global mobility is like (based on the authors' decade-long study with nearly four hundred expatriates and their managers, as well as over a hundred who were interviewed personally), how it is changing, and why now, more than ever, a hard-nosed ROI approach is necessary.

Paris has long been a storied center of art and culture, and of romance, but in the 1920s its magnetism was especially irresistible. From around the world writers, artists, and composers steamed in, to visit or linger, some to reside. For travelers, Francophiles and the curious, this gossipy retrospective of expatriate life in Paris in the 1920s is a mosaic of quick glimpses—Sarah Bernhardt sleeping in a coffin to overcome her fear of death, Igor Stravinsky diving through a huge wreath at the premiere of his ballet *Les Noces*, Ford Madox Ford meeting Ernest Hemingway, Langston Hughes near starvation, Josephine Baker establishing her nightclub. The list of expatriates is long and luminous, and this book—a work of immense erudition spiced with anecdotes and gossip—documents their haunts and habits, their comings and goings, their relationships intimate and artistic. Structured in thirty-three geographical and very walkable sections, Expatriate Paris is cross-referenced by streets, names, and topics and equipped with nine maps to

satisfy the most demanding traveler, whether real or armchair.

In this book, you will learn how and why the movement started, what it was like to be a writer in Paris, and what led to its fall. A list of essential reading from the period is also included in the book.

In this wide-ranging consideration of intellectual diasporas, historian Peter Burke questions what distinctive contribution to knowledge exiles and expatriates have made. The answer may be summed up in one word: deprovincialization. Historically, the encounter between scholars from different cultures was an education for both parties, exposing them to research opportunities and alternative ways of thinking. Deprovincialization was in part the result of mediation, as many Žmigrižs informed people in their "hostland" about the culture of the native land, and vice versa. The detachment of the exiles, who sometimes viewed both homeland and hostland through foreign eyes, allowed them to notice what scholars in both countries had missed. Yet at the same time, the engagement between two styles of thought, one associated with the exiles and the other with their hosts, sometimes resulted in creative hybridization, for example, between German theory and Anglo-American empiricism. This timely appraisal is brimming with anecdotes and fascinating findings about the intellectual assets that exiles and immigrants bring to their new country, even in the shadow of personal loss.
